POWERED BY ALRT

GluCurve® Pet CGM

Built for Pets. Built for Vets. Built for Better Diabetes Care.

Stop gluing on human CGMs or relying on spot checks alone.

The GluCurve Pet CGM makes it easy to identify the glucose trend and make insulin adjustments to better regulate diabetic patients.

Gentle, Easy Application
Applied effortlessly with the push of a button.

Adhesive Designed for Pets
No need for glue which damages the skin and irritates the pet.

Fixes Human CGM Frustrations
800 mg/dL glucose range, 14 day memory, view readings on multiple phones (no reader needed).

Management Designed for Vets
Free web-based management portal custom built for veterinarians.

Why Continuous Monitoring Matters

The GluCurve Pet CGM

- ✓ Readings every minute for 14 days
- ✓ Shows the overall glucose trend
- ✓ Avoids stress induced glucose elevations
- ✓ Shows highs, lows, and variations
- ✓ Applied in minutes, vet portal manages data
- ✓ Cost effective for pet owners
- ✓ Adjust insulin from daily home life trends

In-Clinic Blood Glucose Curve

- ✗ 7 readings over 12 hours
- ✗ Incomplete picture of daily glucose
- ✗ Can elevate glucose levels from stress
- ✗ Misses highs, lows and variations
- ✗ Taxing on clinic staff and time
- ✗ Expensive for pet owners
- ✗ Limited insights in a clinical setting

AlphaTRAK Spot Checks at Home

- ✗ Occasional readings throughout the day
- ✗ Single view of glucose
- ✗ Difficult for many owners to perform
- ✗ Misses highs, lows, and variations
- ✗ Difficult for clinic to interpret and use
- ✗ Often inadequate on its own
- ✗ Difficult to adjust treatment with

The GluCurve Pet CGM was designed to fix all the problems of using human CGMs on pets
